Description

Hello! Wondering if those of you from Kyndryl, TD/Synnex, IBM US PAY, & NW Mutual can provide some EOY feedback for my checkpoints when you have a moment. Thank you & hope you are all well.

Hi Theresa,

I have nothing but great things to say for the time we worked together on Kyndryl. Immediately upon joining, you were a leader for the project and had managed to obtain requirements from many different areas and consolidate into a user-friendly documentation that was used to train all new resources. I was able to learn so much from you as well from a management and organization standpoint. Although we worked many long hours and many weekends, you made it enjoyable and I hope to work with you again! You are a model consultant and we need more like you!!

Theresa exceeded all objectives and delivered outstanding results on all relevant measures. She was highly credible with the client due to her excellent technical skills. She has received positive feedback from TD/Synnex client stakeholders.

She always make it a point to keep everyone in check which is very helpful to the team to make sure deliverables and deadlines are met timely.

Thanks for your support and keep up the good work.

Theresa is a remarkable leader and talent in the Workday@IBM space. She was the lead Data Conversion solution, design, and execution consultant on Workday@IBM's Project Ocean for Kyndryl. From the beginning Theresa established herself as a true professional and leader - she provided a wealth of information and direction to lead the project. This included her taking responsibility on data discovery and solution execution - Theresa knew the right things to ask and always offered her expertise to get our groups moving in the right direction. Theresa has wonderful business acumen, she is professional and responsive. Her constant commitment, transparency, and flexibility - allowed the project

to succeed - you can tell that she truly cared in the success of the team and project. Theresa was a demonstrated leader, delivering the solution along with attention to timeline and budget. I would welcome to work with Theresa again on any future project within Workday or other Product.

In 2021 I worked with Theresa during her roles as Data Conversion Lead and Architect on the Kyndryl Day 0 and the IBM Workday US Payroll and Time Tracking projects.

Her steady demeanor and can-do attitude has provides a groundwork for success. Despite numerous challenges like ever changing org structure requirements in the Kundryl project, she was able to provide solutions and mobilize the data conversion team, and work any hours needed to meet the DC teams commitments.

In the IBM US payroll project, as Data Conversion Advisor, she is providing guidance to a newer IBMer. A testament to her leadership, I have not had to intervene as she and team have kept the data

workstream on track, but alerting sufficiently of any project risks or roadblocks.

Theresa is a valuable asset to IBM and any project she works on. I am glad to have her continued support on our team for this project.
