Objective

After 6 years spent in Software Consulting at IBM - working with clients such as Google, Johson&Johnson, Wal-Mart and New Balance- I am ready for a new adventure in the web3 world. With a year spent independently mastering blockchain fundamentals, smart contracts, and front-end development, I've honed a skill set that's fueled by an unwavering enthusiasm for programming and blockchain technology.

Experience

JULY 2022 - PRESENT
Blockchain Developer | Boston, MA

Blockchain Developer Apprentice | Sep'23- Present | BCAMP
- Building blockchain-based certification app using Ethereum Attestation Service
- Collaborating within 4-member development team to build, test, and deploy app
- Utilizing Solidity for smart contract development and React for front-end

Community Volunteer | Sep'23-Present | Boston Blockchain Assoc.
- Contributing to weekly newsletter research and content creation
- Actively participating in Web3 conferences and events

Web3 Hackathon/Bootcamp Participant | July'22-Present | Various
- Developing responsive web3 React apps for multiple hackathons/bootcamps
- Leveraging REST APIs to dynamically retrieve real-time on-chain data
- Deploying secure Solidity/Rust smart contracts and integrated wallet functionality
- Exploring projects utilizing layer 2 chains, zk-rollups, NTFs, oracles, and more
